

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-8336
Project Name	EduGenie — Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes / N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	N/A / Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
EduGenie/
├── frontend/      - User interface and learning pages
├── backend/       - Server-side application and API
├── components/    - Reusable UI components
├── services/      - AI and application services
├── routes/        - API/application routes
├── tests/         - Test files and test results
├── public/        - Static assets
├── .env.example   - Environment variable reference
├── requirements.txt / package.json - Project dependencies
└── README.md     - Setup and execution instructions
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not deployed — runs locally
Login Credentials (Demo)	Provide demo username/email and password, if login is required
Platform / Hosting Provider	Local Development Environment
Repository Link	https://github.com/KamaliSenthilkumar/EduGenie-Google-Gemini-Powered-Learning-Assistant.git
Demo Video Link	https://drive.google.com/file/d/1r5aHJjCEOXrgDewneq0hhy9XJhX4flrf/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: Install Python, Node.js and required dependencies. Step 1: Open the EduGenie project in VS Code. Step 2: Install the required dependencies. Step 3: Configure the .env file with the Google Gemini API key. Step 4: Start the backend server. Step 5: Start the frontend application. Step 6: Open the local URL in a browser and test EduGenie.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI response time may vary depending on network speed and Google Gemini API response time.	Wait for the API response and retry if necessary.
2	The application requires a valid Google Gemini API configuration for AI features.	Configure the API key through the environment configuration.
3	AI-generated responses may require verification for academic accuracy.	Users should review important information with reliable learning resources.
